

A seed needs space to grow.
 Seeds do not have legs and feet, but they can still really move.

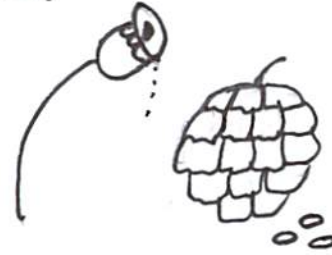

Have Seed, Will Travel by _____

San Diego Botanic Garden
 230 Quail Gardens Drive
 Encinitas, CA 92024

Some seeds float on **water.**

Some seeds sway or drop and roll away by **gravity.**

Like pine cones, bunya bunya, poppies, or Nile lilies.

Like dandelions, milkweed, maple or Tipu squirts.

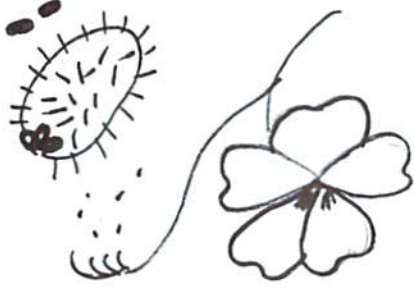

Some seeds can float on the **wind.**

Some are **eaten or buried** by animals or people.

Like fruits and nuts

Like impatiens or wild cucumbers.

Some **explode** away to a new place.

Some seeds **hitch hike** on animal fur or people's clothes.

Like burrs or grass seeds.
